Passionate and driven Flutter Developer with a relentless pursuit of excellence in mobile application development. Inspired by the continuous evolution of technology, I thrive on embracing new challenges and pushing the boundaries of what's possible within the Flutter framework. Eager to collaborate with seasoned professionals in the field, I am motivated to contribute innovative solutions and elevate the standards of mobile app development within a dynamic team environment.

Projects

Grocery App:

- Developed a mobile application to streamline the grocery shopping experience for users.
- Utilized Flutter and Firebase to implement real-time updates and secure user data storage.
- Improved user engagement and retention through personalized recommendations and user-friendly interface.

Online Plants App:

- Created a mobile platform for users to browse and purchase a variety of plants online.
- Integrated payment gateways and order tracking features using Flutter and Firebase.
- Increased sales and customer satisfaction through seamless navigation and efficient order processing.

COVID App:

- Designed and developed an app to provide real-time updates and resources related to the COVID-19 pandemic.
- Implemented health tracking features, vaccination information, and safety guidelines for users.
- Contributed to public health awareness and safety during the global health crisis.
